Forecast for Tuesday 27 Oct 2020

Weather: Area of rain feeding from the west overnight, bringing some heavier outbreaks towards dawn, chiefly across western and southern peaks. Overcast with rain through much of the morning, heaviest in the west. Clearing during the late morning and early afternoon with sunshine and showers following from the west. Showers building during the evening, particularly in the far west bringing the risk of hail and thunderstorms towards midnight.

Chance of cloud free mountain/hill tops above 600m: Virtually nil at first with bases extensive from 450-600m, becoming during the afternoon 80% as bases lift and break.

Visibility: Generally moderate or poor in the rain and sporadically in later showers, less in hill fog.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Hazardous conditions during the morning with extensive hill fog and strong summit winds, which may reach gale force over most exposed ridges and summits, bringing a severe chill effect.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
15:00 on Mon 26 Oct 2020	9mm	42.8mm	52.4mm

Forecast for Wednesday 28 Oct 2020

Weather: Showers frequent during the morning and early afternoon, occasionally heavy with the risk of hail and thunder. Outbreaks gradually turning lighter and less frequent from late afternoon and through the evening. East always seeing the best of the limited shelter.

Maximum wind: Southwest initially mean 30-35mph, with gusts reaching 50mph across most exposed ridges and summits, easing a little from late morning.

Chance of cloud free mountain/hill tops above 600m: For any given time 80% during morning and 90% for the afternoon, but lowering 450-600m as showers push through.

Visibility: Good lowering to a handful of kilometres in showers.

Temperature: **Valleys:** Plus 6 Celsius increasing 14 Celsius during the afternoon
At 600m: Plus 4-6 Celsius
Freezing level: Above summits
